

Terminal 1

ARMCHAIRS

2008

Jean-Marie Massaud

Description

With the dual function of armchair and chaise longue, Terminal 1 possesses the essential elements of a floating sculpture. A strong aptitude for experimentation results in fluid shapes, epitomised by an exquisite balance between the seats and the metal support, and a striking contrast between the glossy frame and the matt leather cover, enhancing the sophistication of the piece's monochrome appearance.

Technical information

Internal shell

hard polyurethane

Internal shell upholstery

flexible cold shaped polyurethane foam

Support frame

tubular steel

External shell

hard polyurethane

Ferrules

thermoplastic material

Cover

Gamma leather
