RF1905 SIDEWAYS COFFEE TABLE

The RF1905 Sideways Coffee Table is designed by Rikke Frost, who is known for her soft and organic typology and exploration of materials, this contemporary round coffee table features a traditional handcrafted wooden frame with a reversible tabletop. Resting on four elegant brass fittings, it offers versatility to a variety of interior settings, available in oak or walnut with laminate on the reverse side. An alternative version in Italian marble introduces a more prominent expression to the design. An additional shelf sits below as a space to rest your phone, tablet or book. Ideal for both residential and public settings, the Sideways Coffee Table displays a neat and refined aesthetic that echoes the soft curves and material combinations of the existing Sideways Series and as such can be used in conjunction with or as a stand-alone piece.
