DESIGNER / YEAR OF DESIGN
Piet Hein/Bruno Mathsson/Arne Jacobsen, 1968

ABOUT THE DESIGNER

Piet Hein (1905-1996)
A rational idealist, Piet Hein was neither an architect nor a furniture designer, rather he was a philosopher, poet and mathematician. He created the Super-Ellipse as a new oval shape for the creation of Sergels Torg in Stockholm.
In cooperation with the Swedish designer Bruno Mathsson he later used the shape to make the Super-Elliptical table series, which Fritz Hansen put into production in 1968.

Bruno Mathsson (1907-1988)
Bruno Mathsson was an internationally renowned Swedish designer and architect. An advocate of an idiom characterized by simplicity, beauty and elegance, he used the same principles also in the furniture he designed. Mathsson's furniture was innovative in both technology and design, and his production methods involved bending of laminated wood.

Arne Jacobsen (1902-1971)
The cooperation between Arne Jacobsen and Fritz Hansen dates back to 1934. But it was not until in 1952 a breakthrough came with the Ant™. It was succeeded by the Series 7™ in 1955, where he and Fritz Hansen's names became a part of the world furniture history. Arne Jacobsen was very productive both as an architect and designer.
