Chisel Lounge Chair

Design by Andreas Bergsaker

The latest design collaboration with Norwegian designer Andreas Bergsaker, Chisel Lounge Chair references the same-named classic carpentry tool in its historically grounded yet contemporary aesthetics. Created from the desire to design a solid wooden chair with a distinctive silhouette that would stand the test of time, the chair's considered craftsmanship and ergonomics provide optimal support and comfort in a visually appealing way. Chisel's compact size and wide variety of wood types, colours and upholstery options make it a versatile and relevant lounge chair that can easily be integrated in most private and public contexts.
