- NEU FAMILY -

NEU FAMILY

The combination of Neu's ergonomically moulded shell with cast swivel base or solid wooden legs results in a perfectly defined profile. The durable, finely-grained plastic adds textural interest, while the rim detail gives the design structure and character. In the upholstered version a delicate stitching line runs across the seat and the piping detail accentuates the chair's raised rim. Its functional and comfortable construction and flexible design options makes it the perfect choice for offices or dining rooms.

NEU 12

Neu 12's ergonomically moulded shell is reinforced with an aluminium construction under the seat to provide extra strength and durability. The finely-grained plastic adds textural interest, while the rim detail gives the design structure and solid wooden legs complete the perfectly defined profile. In the upholstered version a delicate stitching line runs across the seat, while a piping detail accentuates the chair's raised rim. Its robust, comfortable structure and flexible design options make it the ideal choice for both private and public environments.

- NEU 12 BAR STOOL -

NEU 12 BAR STOOL

Whilst retaining the same distinctive profile as the rest of the collection, the Neu 12 bar stool has long slender legs in solid wood that enhance and elongate its uncluttered silhouette. It features an ergonomically moulded shell with a high, supportive back, and is reinforced with an aluminium construction under the seat to provide extra strength and durability.

The finely-grained plastic adds textural interest, while the rim detail gives the design structure. In the upholstered version, a delicate stitching line runs across the seat, while a piping detail accentuates the chair's raised rim. Its comfort and versatility make it the ideal choice for using as a bar stool or counter stool in both private and public environments.

NEU 13

Neu's ergonomically moulded shell combined with its round solid wooden legs results in a perfectly defined profile. The durable, finely-grained plastic adds textural interest, while the rim detail gives the design structure and character. In the upholstered version, a delicate stitching line runs across the seat, while a piping detail accentuates the chair's raised rim. Its robust and comfortable construction and flexible design options makes it the perfect choice for offices or dining rooms.
