

PC LINEAR

DESIGN BY PIERRE CHARPIN

HAY

– PC LINEAR –

## PC LINEAR

The newest addition to Pierre Charpin's iconic collection of PC Lights, the PC Linear shares its sleek, monolithic aesthetic with the rest of the line. Concealing its technological elements inside the shade, it has an elegant contemporary silhouette that works well in both domestic and professional environments. The tulip-shaped form of its shade is a visual link between the PC Linear and the other lights in the PC Family, resulting in an appealing aesthetic harmony.

## PIERRE CHARPIN

Trained as an artist, Pierre Charpin has devoted himself to furniture and object design since the early 1990s. His approach to design is strongly influenced by his artistic background. Pierre's research on form and color characterize his work and can be seen in both, limited edition products and industrial products like the PC lamp. The use of a simple vocabulary and elementary forms is a constant aspect in his work, as well as the desire to offer sensual objects. Drawing, which he practices as a starting point for his designs, is an essential part of his creative process. Pierre Charpin's pieces have been included in exhibitions around the world and are held in many museum collections. He was elected Designer of the Year 2017 at Maison & Objet. For HAY he has made the PC Task Light, PC Portable, PC Table, PC Pendant, and the PC Linear.

## DESIGN HIGHLIGHTS

PC Linear is the first linear suspension lamp in the HAY Lighting Collection. This typology of light is ideal for meeting spaces, conference tables, or even a kitchen area in a domestic or professional setting. In terms of functionality, PC Linear is extremely flexible. It offers a uniform dissipation of light, and is adjustable in both height and brightness, so it can be used to satisfy any condition or requirement.
