

Visiona Stool

Verner Panton, 1970/2012

vitra.

Verner Panton designed the Visiona Stool as part of the interior installation created in 1970 for his legendary Visiona II exhibition in Cologne. The compact upholstered stool provides practical and comfortable seating.

The unobtrusive geometric shape enables the Visiona Stool to be combined with a wide variety of furnishings. Light in

weight, it can be easily repositioned and arranged in spontaneous groupings. Its fabric cover is secured with an elastic band, which makes it simple to remove and clean.

The Visiona Stool comes in a range of fabrics and colours, allowing it to be matched to any environment or interior – whether to create a subtle aesthetic or add a striking highlight.

Materials

- **Upholstery:** polyurethane foam with polystyrene core and polyester filling.
- **Base:** MDF board with felt glides.
